Panel 4C Pseudobulk DE in LUAD and SCLC (dataset 576f193c; all genes tested)

FDR<0.05 (Benjamini-Hochberg) and |log2FC|>0.5; PyDESeq2 0.5.4; raw-count pseudobulk per donor x cell type x condition

LUAD not tested: endothelial cell (9 vs 2 donors), erythrocyte (0 vs 0 donors), fibroblast (11 vs 1 donors), neutrophil (2 vs 1 donors), plasma cell (5 vs 0 donors)
SCLC not tested: endothelial cell (5 vs 2 donors), fibroblast (4 vs 1 donors), mast cell (1 vs 4 donors), neutrophil (0 vs 1 donors), plasma cell (0 vs 0 donors)
A contrast requires >=3 donors with >=10 cells in BOTH groups.
