A Breadth across 120 normal tissue and immune cell-type samples (expression MCP)
lung
1683 TPM
Number of tissues / cell types
CD276 RNA (TPM, log scale; 0 clipped to 0.1)
B Selected normal tissues; lung (red), bronchus (orange)
alternatively activated macrophage
inflammatory macrophage
macrophage
placenta
tibial artery
subcutaneous adipose tissue
smooth muscle tissue
adrenal gland
aorta
liver
coronary artery
heart left ventricle
lower leg skin
uterus
breast
prostate gland
pancreas
stomach
lung
skeletal muscle tissue
colon
thyroid gland
spleen
cerebral cortex
kidney
cerebellum
lymph node
testis
blood
mature neutrophil
bone marrow
CD8-positive, alpha-beta T cell
CD4-positive, alpha-beta T cell
regulatory T cell
bronchus
CD276 RNA (TPM)
